WifiBB

- **iPad Point-of-Sale (POS) and inventory management app**
- **Increasing operational efficiency**

WOMM

- Movie recommendation database
- Crawler for fetching movie reviews from various sites
- Comprehensive movie library in a single app

Hotdesk system

- Interactive real-time map
- QR code check-in system
- Quickly build within a short period

Web Developments

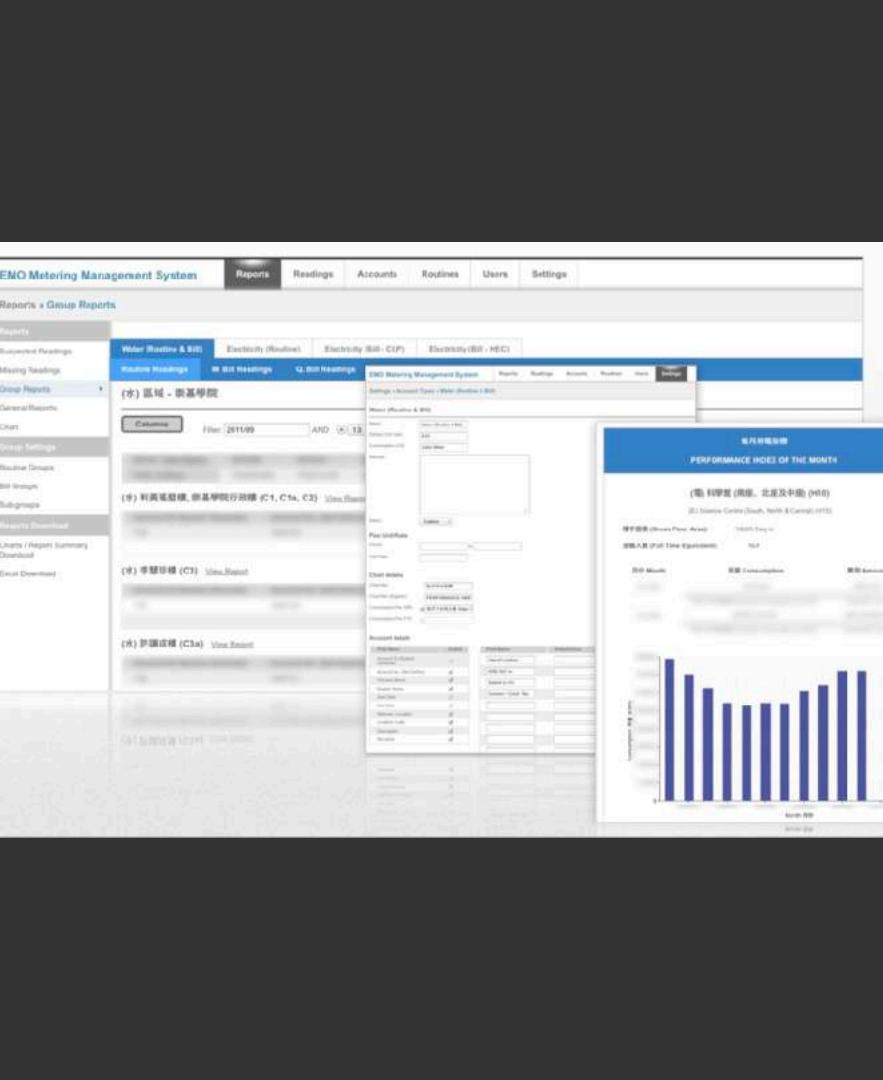

Pandaform

- Web based database application for simple custom workflow with form creations

The screenshot shows the Pandaform website. At the top, there's a navigation bar with links for 'Use Cases', 'Feature Tour', 'Pricing', 'LOGIN', and 'SIGN UP FREE'. Below the navigation is a testimonial box containing a quote from Keith Lawson, Director at JML Property: "PandaForm allowed us to develop our own sales process both simple and effective than anything we had experienced before." The quote is attributed to Keith Lawson, Director, JML Property. Below the testimonial is a pink 'Sign up now' button with the subtext 'You'll be up and running in less than a minute'. The footer features logos for YAHOO!, GREENPEACE, e27 (Web Innovation in Asia), and Reconnect Future. There are also two small preview images: one showing a form creation interface with tools like a wrench and screwdriver, and another showing a completed form with a green header.

Web Developments

CUHK EMO Metering Management System

- Developed for The Chinese University of Hong Kong, the system able to import readings record from over 2000 meters in the university area. It also helps the administrator check the readings as well as generate different types of reports according to the data collected.
- Admin able to approve records and view the summary of data and generate reports.

Web Developments

OneSky

Onesky Service Management System

- Online admin CRM platform for managing translation jobs, orders and clients

The screenshot displays the OneSky Service Management System interface. At the top, there's a navigation bar with links like 'Dashboard', 'Jobs', 'Orders', 'Contacts', 'Metrics', and 'Management'. Below the navigation is a sidebar with sections for 'Job Details' (Job ID: #194837, Due at 02/01/2017, 452 words), 'Job Type' (Translate), 'Specialization' (Same), and 'Delivery Date' (13/01/2017, 0:00pm). A 'JOB PRICE AND PAYMENT' section shows 'Number of Words' (200), 'Calculated Price' (\$25), and 'Number of Sentences' (2). To the right, there's a 'Assigned Vendor' section for Catherine NC, showing her profile picture, name, and a progress bar for 100-200 words. Below that is a 'Client' section for Nintendo UK, with a message box asking for availability. The main area features a table titled 'Pending Assignment' with columns for 'Start Date', 'Due Date', 'Translate To', 'Translate From', and 'Keywords'. The table lists multiple entries for 'Bandai Namco' with various status buttons like 'PENDING', 'REVIEW', and 'TRANSLATE'.

How we work on UI/UX Design

“It's better to have 100 people love you than finding a million who just sort of like you”

Brian Chesky, Co-founder of Airbnb.

Creating great user experience through iteration, directing your users to a desired interaction and goal.

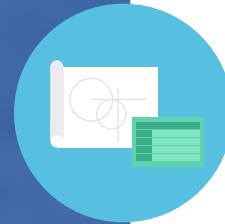

User flow & Wireframe

How your users interact and engage with your application.

UI Design Interactive Prototype

Preview how the app looks and works before going on to the development stage

Development Plan

Estimates, plan and research for the development project

How we work on High Quality Product

Development schedule - Seeker -iOS

Developer 1 - Joey: 12 Sep - 2 Dec [58 days]

Week 1 (12 - 15 Sep) (4 man-days)

- Developer 1 - Project setup [3]

Week 2 (19 - 23 Sep) (5 man-days)

- Developer 1 - Sign up [4]

Week 3 (26 - 30 Sep) (5 man-days)

- Developer 1 - Login/ logout [1.5]
- Developer 1 - SMS verification [1.5]
- Developer 1 - Reset password [1]

Week 4 (3 - 7 Oct) (5 man-days)

- Developer 1 - Reset password [2]
- Developer 1 - Map definition [2.5]

Week 5 (10 - 14 Oct) (5 man-days)

- Developer 1 - Map API integration [2]
- Developer 1 - Main screen - Map view [2]

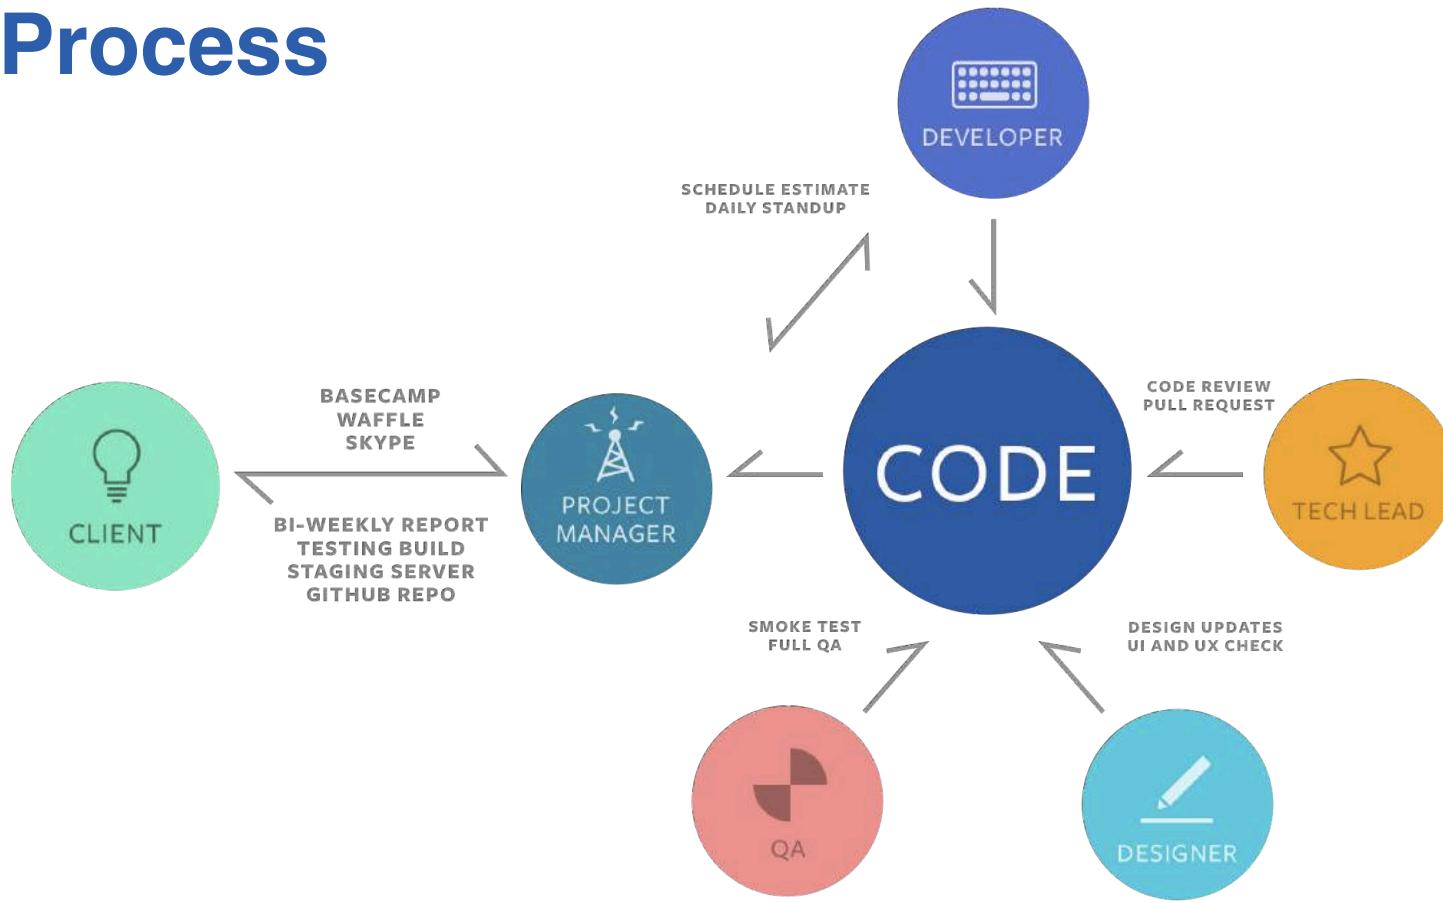

Week 6 (17 - 21 Oct) (5 man-days)

- Developer 1 - Main screen - Map view [2]

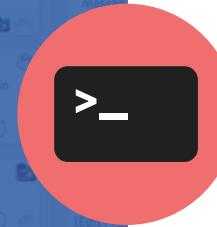

Step by Step for Development

- **Break down the design prototype into small features**
- **Assigning the work bi-weekly**

Our Process

Bi-weekly progress reports and intermediate builds are prepared by our Project Manager, dedicated Developers, QA Testers and Code Reviewer

Development Iterations

Progress reports, estimation updates, schedule updates

QA Process updates and test builds

Test build with progress updates stating latest progress, QA status of the current test build

Deployment Phase

Bug fixing, performance optimising, features fixing with final deployment of software to the server and apps

Thank you

Let's innovate together! :)
